

INFORMATION SECURITY AUDIT STATEMENT

Date: 20.02.2026
Customer: LightningChart Ltd
Service: Dashtera
Auditor: 2NS Cybersecurity Oy

Statement:

Independent auditor 2NS Cybersecurity Oy (2NS) has audited and verified the information security of the Dashtera platform. The audit was conducted in staging environment. According to the audit and the fix verification, the service has no identified critical, high, or medium severity vulnerabilities at the time this audit statement was issued.

About the audit & verification:

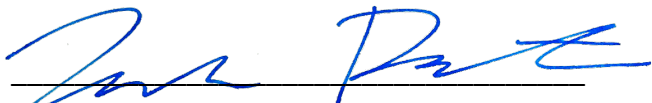

The audit methodology was based on recognized industry standards and best practices, including OWASP Top 10 and OWASP Application Security Verification Standard (ASVS). The application's source code was accessible and web application firewall (WAF) was disabled during the audit.

Time and workload of the audit & verification:

The audit was performed in November 2025 – January 2026. Implemented fixes were verified in February 2026.

2NS Cybersecurity Oy (2NS) has audited hundreds of business-critical applications. 2NS has reported and released multiple advisories related to products of, for example, the following companies: A-Link, Buffalo, Checkpoint, F-Secure, HP, IBM, Oracle, SAP, Xerox, Zyxel.
